PROFESSIONAL SUMMARY

Backend-focused .NET Developer with hands-on experience building scalable web applications using C#, ASP.NET Core MVC, Web API, Entity Framework Core, and SQL Server. Experienced in designing relational database schemas, implementing OAuth 2.0 and ASP.NET Core Identity authentication, and engineering idempotent API endpoints. Passionate about clean architecture, query performance, and building production-grade software.

TECHNICAL SKILLS

- **Backend & Core:** C# | ASP.NET Core 8 | EF Core | SignalR | MediatR | LINQ | REST APIs | BackgroundService
- **Database & Security:** SQL Server | MySQL | PostgreSQL (Supabase) | OAuth 2.0 | Identity & RBAC | B-Tree Indexing
- **Frontend & Tools:** JavaScript | React.js | Next.js | Flutter (Dart) | Tailwind CSS | Git/GitHub | Postman

PORTFOLIO PROJECTS

Gallrex — Auction Platform gallrex.runasp.net *ASP.NET Core 8, EF Core, SQL Server, SignalR, MediatR, BackgroundService*

- **Real-Time Concurrency:** Engineered a sub-10ms live auction engine via SignalR; eliminated simultaneous bid collisions using Optimistic Concurrency (RowVersion) and memory-cached idempotency tokens.
- **Autonomous Settlement:** Built a hosted BackgroundService with PeriodicTimer and scoped DI to autonomously detect expired auctions, declare winners, generate orders, and broadcast closure events.
- **Database Optimization:** Optimized SQL Server execution plans by designing Covering Non-Clustered B-Tree Indexes and server-side keyset pagination, eliminating table scans and slashing latency to < 1ms.

Mockrithm mockrithm.me

Next.js, TypeScript, Groq, Whisper, Firebase, SSE

- **Conversational AI:** Built an interactive voice interview platform integrating Whisper speech-to-text, real-time LLM inference, and audio streaming for candidate practice sessions.
- **API Reliability:** Implemented multi-key API failover and rate-limit tracking to prevent service disruptions and session drops during concurrent practice tests.
- **Automated Evaluation:** Designed structured evaluation pipelines to analyze candidate responses and generate comprehensive feedback reports with actionable scoring.

Shifa Management System github.com/ahmed-husssain/ShifaMS *Flutter, Dart, Supabase, PostgreSQL, Riverpod, RLS*

- **Clinical Operations:** Engineered a home healthcare ERP platform featuring patient records, staff allocation, and multi-tier role-based access control (RBAC).
- **Atomic Billing:** Architected a gapless invoice generation engine using custom PostgreSQL RPCs and transactional locking to prevent sequence collisions.
- **Automated Monitoring:** Implemented automated care plan expiration alerts, staff presence tracking, and instant medical PDF invoice generation.

ACHIEVEMENTS & CERTIFICATIONS

- **Runner-Up** – Aptech Vision 2025 (Project: Mockrithm)
- **Winner** – Aptech Tech Olympics Season 1 (Master of Excel Intelligence)
- **Participant** – Aptech TechWiz (Project: FurShield)

EDUCATION

Bachelor of Science in Software Engineering (BSSE)

Present – 2030

Virtual University of Pakistan (Distance Learning)

Aptech Certified Computer Professional (ACCP)

Present – August 2027

Aptech Computer Education (Currently Enrolled)

Intermediate in Computer Science (ICS)

2024 – 2026

Govt. College For Men, Nazimabad, Karachi
